SUPERSCOPE.

February 18, 2005

To whom it may concern,

I am writing this letter of recommendation at the request of Mr. Jason Vlamakis, former Lead Service Technician for Superscope Technologies, Inc. Geneva, IL USA.

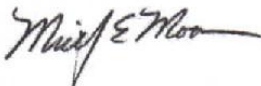

Superscope Technologies is a distributor of professional audio products, catering to the needs of the music education and practicing musicians market on a worldwide basis. From 1991 through 2002, Superscope also served as the North American Distributor of Marantz Professional Audio and Video Products. During his tenure with Superscope Technologies from March 1998 through June, 2003 Jason held two primary positions starting as Service Technician and being promoted to Lead Service Technician in January 2002.

Jason's primary responsibilities for Superscope included component level repairs of audio and video product including surface mount repairs, receiving updating and invoicing completed repairs, scheduling and supervising daily activities for two additional technicians and one warehouse pick and pack operator, phone technical assistance to both end users and service centers, parts and finished goods direct sales, and served as the "resident expert" for repair of the most problematic units encountered by the technicians.

During my time spent supervising and working with Jason, I found him to possess many key attributes that contributed to the success of Superscope. Jason is a very aggressive and hard working individual. Conscience of not only his own productivity, but also the contribution he and his staff made to bottom line. Jason's warm personality allowed him to develop excellent relationships with fellow employees, outside sales support staff and a very loyal end user following that exist for him even today at his current D&M Professional position. Jason also exhibits the ability to motivate those around him, primarily through his own pace and drive along with a keen eye on what is going on around him.

It is my personal opinion that the company fortunate enough to hire Jason will in short order find him to be an exemplary employee and a key figure in their overall success. Should you wish to discuss Jason's previous employment with Superscope or have additional questions regarding his skills and abilities please feel free to contact me directly @ (630) 232-8900 ext 252 or email to mmoore@superscopetechnologies.com.

Sincerely,

Micky Moore
